Made in USA at Suncor

## Suncorstainless.com Got a "Face-Lift"

If you haven't already seen it, the Suncor website has been reconstructed and updated. The look and feel has changed, but the flow has been improved to allow for easier accessibility to important information. The new search feature enables you to quickly find the stainless steel hardware that you desire. Please feel free to send any input about what you like or don't like about the new website. We welcome your opinions and look forward to hearing from you. Please email your feedback to Carey Greenway; [carey@suncorstainless.com](mailto:carey@suncorstainless.com).

## NEW PRODUCTS

### Mil Spec Swage Fittings

We have joined the elite rankings of companies in the U.S. Government's Quality Manufacturer's List (QML). After extensive technology investments, manufacturing and testing, we have met the government's quality and testing requirements for aircraft control cable terminals and assemblies. We are now listed in QML-6117 and QPL-781 for these specific components. These qualified stainless steel swage components are left hand and right hand thread Swage Studs (MS21259), Swage Eyes (MS20668), Swage Forks (MS20667) and Single Shank Balls (MS20664), with sizes ranging from 1/16" to 3/8".

**MS21259-Series**  
Swage Stud

**MS20668-Series**  
Swage Eye

**MS20664C-Series**  
Single Shank Ball

**MS20667-Series**  
Swage Fork

### Hand Swage Turnbuckles & Fittings

We have introduced a new line of stainless steel hand swage fittings and turnbuckles into our already expansive collection of stainless steel rigging hardware. This new hand swage series boasts 19 different types of stainless steel terminals and turnbuckles to fill the needs of various marine, lifeline and architectural applications. These components are made from grade 316 stainless steel (open body turnbuckles feature a chromed bronze body) for maximum corrosion resistance and durability. They are offered in two different sizes, 1/8" and 3/16" and feature open body, closed body, pelican hook, lifeline adjuster, toggle, eye, double eye, swivel eye, wall mount, stud and terminal styles. We recommend using a 7x7 construction stainless steel wire rope (or vinyl coated wire rope). When installed properly, these hand swage fittings will hold approximately 65-75% of the strength of 7x7 wire rope. Hand swage tools and an electric portable swage tool are available for a quick and easy installation.
